

# Itay Binayev

## Full-Stack And Software Engineer

A former soldier who has completed both military service and a full-stack software engineering course, gaining experience with a range of programming languages and technologies such as node.js, React, Angular, C#, .NET, and SQL. Seeking a software or full-stack developer role.

### Education

- |                            |  |
|----------------------------|--|
| <b>2022-7 –<br/>2023-5</b> | <b>Full-Stack and Software Engineering Course, Sela College, Bnei Brak</b> <ul style="list-style-type: none"><li>Completed comprehensive training in full-stack software engineering, including in-depth study of node.js, React, Angular, C#, .NET, and SQL</li><li>Developed proficiency in creating robust and scalable web applications using industry-standard tools and methodologies</li><li>Gained hands-on experience in working on real-world projects, collaborating with teammates, and delivering high-quality work under tight deadlines</li></ul> |
|----------------------------|--|

### Military Service

#### Golani, 51st battalion

- As a soldier, acquired extensive training and experience as a fighter, which required dedication and discipline
- Utilizing thermal technology equipment for precise measurements and analysis, allowing for efficient and effective solutions in a variety of settings
- Gained valuable experience in working collaboratively with diverse teams towards achieving shared objectives, while also demonstrating the ability to face high-pressure and stressful situations
- Leveraged individual strengths and built strong working relationships, which have contributed to the success of the team and the achievement of our shared goals
